NURSERY STOCK**  
-1-

*FROM*

**The Barnes Brothers  
Nursery Company**

**YALESVILLE  
CONNECTICUT**

# TERMS ON WHICH WE SELL NURSERY STOCK

## Important—Please Read Carefully

Bank draft or money order, payable to The Barnes Brothers Nursery Company, must accompany all orders amounting to \$25 or less, a cash discount of 5 per cent being allowed on the total amount.

We will ship larger orders C.O.D., providing 25 per cent of the total amount of your order is sent in cash. If the order is shipped by **express**, you pay the balance to your **express agent** upon delivery of goods.

If the order goes by **freight**, you pay the balance at **your bank**, where you will also find the bill of lading, which you present to your freight agent, who will deliver shipment to you.

**Note.**—We allow a cash discount of 5 per cent on all orders, large or small, for which the total amount with order is remitted.

## TRANSPORTATION RULES

Our goods are sold **f.o.b. cars** at the point of shipment and travel at the purchaser's risk and expense. Because of the present unsettled conditions, we wish to emphasize still further that we do not guarantee safe delivery. The ownership of all goods sold by us passes to the purchaser after delivery by us to the carrier, and the issuing of a receipt by the carrier ends our responsibility. Any claims for damage should be made promptly to the agent of the transportation company at the point of delivery.

**THE BARNES BROTHERS NURSERY CO.**  
**YALESVILLE, CONNECTICUT**

**CLAIMS**, if any, must be made upon receipt of goods, when they will be carefully and cheerfully examined, and, if just, satisfactory adjustments will be made with purchaser. Claims made *after* five days from receipt of goods will not be entertained.

**NON-WARRANTY.** (1.) If any nursery stock shall prove untrue to the label under which it is sold, provided notice and proper proof thereof are furnished by the purchaser to the seller, the seller shall, at the option of the purchaser, either refill that portion of order which was mislabeled, by another delivery of stock, or refund the purchase price; but in any case, we are not to be held responsible for a sum greater than the original selling-price of such stock. (2.) All sales or agreements of sale are made subject to shortage of nursery stock, fire, frost, floods, drought, or other causes beyond the control of seller.

**INSPECTION.** Our Nurseries have been thoroughly inspected and found free from San José Scale and other injurious insects or diseases. Certificate accompanies.

**WE CANNOT REPLACE STOCK GRATIS.** These prices do not include any guarantee of growth. We will guarantee our stock to be in first-class condition when delivered to our railroad station, but, unless customer insures, we will not be responsible for stock which may not grow, as we have no control of it after it leaves our hands. We will guarantee the growth of stock for 30 per cent over and above prices in this list—payable before shipment and subject to conditions named on our printed order blank. If you lose this order blank, we will be glad to send you another, but failure to use our printed form for placing of orders, and also to insure the stock, will be interpreted as meaning that the customer assumes his own risk of the stock growing.

**PARCEL POST.** We cannot ship by parcel post any trees larger than 3 to 4 feet in height. *We strongly recommend* that *Strawberries* be ordered shipped by parcel post; large orders by express.

Because of the varying weight of nursery stock and the different zones, we consider it better and fairer to all to add the postage to your bill, to be collected by your postmaster.

**GRADES.** We grade primarily by caliper, height being only approximate, and this places many of our trees in the second grade, which might be sold as first grade by those who grade only by height. We consider that good stock, well graded by caliper, will give more general satisfaction year after year than when graded only by height.

## THE STUBENRAUCH PEACHES

**The Greatest Advance in the Peach Industry Since the Origination of the Elberta**

This group of varieties is the result of the lifelong work of Mr. J. W. Stubenrauch, of Mexia, Texas, the originator of the well-known Carman. A natural-born scientist, he has cross-pollinated, planted and cross-pollinated again, always with the end in view that the results should finally bring forth varieties more hardy, more prolific, and of far better quality than any then in existence, and his efforts have not been in vain, as we can judge from the varieties which will soon be described.

One may presume that Texas would be too far south to test the hardiness of buds, but in reality the Texas climate gives one of the most severe tests to the Peach, both on account of freezes and summer drought.

We have received by mail samples of all varieties described and must admit that they stood the journey remarkably well and have even remained in fine condition in our office for a week without refrigeration of any kind.

These are new in all sections except Texas, but in comparison with the Elberta, in quality, productiveness and hardiness, they not only deserve a standing with that variety, lengthening the season by fully six weeks, but promise to revolutionize our present standard orchard varieties.

This is the first year we have offered these new varieties to the public, and we have only a limited quantity. We can sell only a few to each customer, and while they last will dispose of them at prices named on next page.

## DESCRIPTION OF VARIETIES

**Eva.** Equal to Elberta in size, more round, nearly covered with red, similar quality. Fruit ripens several days in advance of Elberta, and tree is a sure bearer.

**Anita.** Ripens 10 days after Elberta. Seems to be a reproduction of same. Quality is very similar, but tree is even more prolific.

**Tena.** Ripens with Elberta, of same size, perhaps a little more color, and better quality. Very prolific bearer.

**Toughina.** Ripens a week after Elberta. Mr. Stubenrauch says of it: "In size, this Peach is very large, some specimens weighing 12 ounces. The color is a bright yellow, nearly covered with beautiful red. This is practically a nectarine, has no fuzz at all, and skin as tough as a turnip, nearly covered with red; flesh quite juicy, and of highest quality. Quality is far better than Elberta or even Hale, which I have growing close by. Owing to its blooming later, it escapes injury by cold when the Elbertas are killed. Speaking of the Hale, it is certainly ahead of Elberta, and, side by side, Toughina is yet decidedly ahead of Hale."

**Lizzie.** Ripens two weeks after Elberta. Is of light lemon-yellow, with nice red cheeks; fine shipper. Good quality and size with very little fuzz.

<b>Regel's.</b> 1½ to 2 ft.....	25 00	

## HEDGE PLANTS, Evergreen

	100
<b>American Arborvitæ.</b> 1 to 1½ ft.....	\$30 00
<b>Norway Spruce.</b> 1 to 1½ ft.....	30 00
1½ to 2 ft.....	45 00
<b>Mountain Laurel.</b> 1 to 1½ ft.....	45 00
1½ to 2 ft.....	60 00

This Mountain Laurel is fine for hedges, but not as perfect as specimens quoted above.

**BUXUS. Box Tree.** None for sale.

## UPRIGHT SHRUBS

Upright, clean bright stock, strictly first-class. The size mentioned after each variety is that considered as proper for first-class plants, suitable for transplanting. The size varies according to the habit of growth of the varieties mentioned, as, of course, some plants when fully grown are smaller than others, but equally as good.

	Each	Doz.

Mallow Marvels, Red, Pink, and white.	\$1 each, \$10 per doz.

# A WORD TO THOSE WHO RECEIVE THIS PRICE-LIST

Although the war is over, stocks of nearly every commodity have been so reduced that it will take considerable time to restore business to a normal basis. Meanwhile, it is the duty of each one to conserve wherever possible—hence we are issuing this abridged price-list.

You may select and order from this list with absolute confidence that your order will be filled with our usual high-quality stock, and that every care possible will be exercised in the packing and shipping.

We will send our descriptive catalogue to anyone who may desire more information concerning varieties, etc.

**ORDER EARLY.** The war has been directly responsible for the present scarcity of nursery stock. It has been next to impossible to import French stocks for propagation purposes, and this, together with the labor-shortage throughout the country, has resulted in less than one-half the output of mature nursery stock which was on the market before the war. When we stop to consider that it takes one year to produce the raw material, and from two to three years more to produce the finished article, it is easy to see that nursery stock is bound to be scarce for a period of several years.

We offer this suggestion, that many who have, perhaps, been in the habit of placing their orders in spring, may avoid disappointment and loss through the extreme shortage which is bound to be more acute and longer than the next season than ever before.

## ORDER EARLY—DO IT NOW!

**OF RATES.** Customers may select any kind—as 6 apples or 6 peaches—at 500 rate, 500 at 1,000 rate.

**OF ORDERS.** No orders filled for less than \$1.
